

**Most rational**

**Most delightful**

**Darling**

**Long shot**

# Four Categories Method

## Why

At some point in your ideation sessions, you'll have reached a critical mass of ideas, and it will become unproductive to attempt to keep pushing for more. This is referred to as the 'convergent stage' where ideas are evaluated, compared, ranked, clustered and even ditched in an attempt to pull together a few *great* ideas to *act on*. Right now, the aim is spotting potential winners, or combinations of winning attributes, from a number of ideas.

## What

The Four Categories method entails dividing ideas according to their relative abstractness, ranging from the most rational choice to the 'long shot'. The four categories are: the rational choice, the most likely to delight, the darling, and the long shot. This method ensures that the team covers all grounds, from the most practical to the ideas with the most potential to deliver innovative solutions.

## Best practice: How

- Ideation participants decide upon one or two ideas for each of these categories: the rational choice, the most likely to delight, the darling, and the long shot.
- If you're a relatively small team you simply discuss the pros and cons of the chosen ideas.

[Continued on next page]

[Continued from previous page]

- If you're a large team you can mix this method with Post-it Voting (also known as Dot Voting):

## Post-it Voting

- Write all of the ideas which the participants have chosen on individual Post-its.
- Then you give all participants a number of votes (around three to four should do) to choose and write down their personal favourite ideas.
- Participants vote by using stickers or simply using a marker to make a dot on the ideas they like. This process allows every member to have an equal say in the shortlisted ideas.
- You can also use variations in colour in order to let participants vote on which ideas they like the most or which they dislike the most.

# Learn more about how to use this template

Methods of using this template are taught in our online course [Design Thinking: The Beginner's Guide](#). Make full use of this template and learn more about design thinking by signing up for it today.

## Design Thinking: The Beginner's Guide

### ■□□ Beginner course

The world's leading companies, such as Apple, Google and Samsung, are already using the design thinking approach—because they know it's the way forward when it comes to innovation and product success. Through [Design Thinking: The Beginner's Guide](#), you will deep dive into the five phases of this paradigm-shifting approach to problem-solving—empathize, define, ideate, prototype, and test. By receiving detailed guidance on problem-solving activities ranging from ideation techniques—such as brainstorming and using analogies—to ways of gathering feedback from your prototypes, you'll be able to download the other templates involved and effectively use them in your work. Get ready to unpack, explore, and master design thinking—using it to set yourself apart and unlock the next stage of your professional life.

# About the Interaction Design Foundation

INTERACTION DESIGN  
FOUNDATION

Founded in 2002, the Interaction Design Foundation (IDF) is on a mission to provide accessible and affordable design education to people across the world. We provide open-source educational materials as well as online, self-paced UX Design courses. Through taking our courses, you'll benefit from course materials developed by leading practitioners and academics from top-tier universities like Stanford University and MIT. [Learn more about the IDF](#)

## How to advance your career with the IDF

### Attend lessons at your own pace

Learn from UX experts and professors, from anywhere and at anytime

### Network online and offline

Discuss with your peers in your courses, and meet with them in your city

### Advance your UX career

Get an industry-trusted Course Certificate to add to your résumé
